

THE CUSTODY CHAIR

The ergonomically designed Custody Chair utilizing a locking waist belt is the least restrictive in-custody containment system available. The Custody Chair provides a comfortable, pain-free, invisible containment for noncombative subjects in law enforcement or physician-supervised custodial settings. The Custody Chair helps in preventing escapes and sudden violent physical attacks on personnel and the public in courtrooms, police stations, jails, and medical facilities.

The Custody Chair is ideal for use at defendant tables, witness stands, interview rooms, and patient treatment areas.

Ergonomic Comfort Design (ECD) uses manufacturing processes that are friendly and non-threatening to our environment. Materials used in the production process contain no Ozone Depleting Substances (ODSs) (chlorofluorocarbons (CFCs) or hydrochloroflourcarbons (HCFCs)). Our systems are in full compliance with EPA requirements concerning Clean Air and Clean Water. We recycle scrap metal, paper and corrugated waste. We work diligently with our local power company to determine effective ways to conserve energy in our operations.

ABOUT PRIEST ERGONOMICS

In today's working environment, professionals are searching for innovative business and safety solutions that bring together design, comfort, security and consistency in a cost-effective package. Priest Ergonomics was created to combine modern ergonomic and comfort seating for businesses with the security needs and requirements of law enforcement and physicians. As the owner of Priest Ergonomics and a retired deputy sheriff with 20-plus years working in the courtrooms of the San Diego Superior Court, I'm dedicated to providing products that will enhance the comfort of your employees and the safety of our courthouses, jails, police stations, and hospitals.
